

As to my work in the past 30 days upon my coming from Mindoro, in first week... I put the electrical installation both in chapel and house. I finished our dirty kitchen. And after the tired day, if the weather is good, I went for door to door visit and preaching.

The second week, the first two days... I went to a different offices for the electrical purposes but they didn't approved because they were asking for the building permit. I need to go to architect on the civil engineer and need to pay 8,000 pesos, so I decided to stop it for a while and wait for the coming of my support. Maybe this coming December or January, because were lack of budget for it. The rest of send week was busy for door to door visit and preaching.

Oct. 20, I went to NPA semi headquarter (New People's Army) they were one of the activist group here in the Philippines. 20 people heard my preaching there. We had an informal debate for every angle of his faith and we compare it to Church of Christ. All his argument was failed. We also discussed the "One True Church" and the divine name of it. The one baptism and its organization, the Day of worship, giving, the Lords supper, singing as a form of offering to God, he admit and agreed that my argument was right. He said that he enjoyed the three hours of discussion. But, I was sad to hear that after two days, he went to abroad due to his job as an engineer in Singapore, but I believe and have faith that after he heard the word of God, someday, in God's will... he will also obey the gospel.

At last I meet them, but they told me that they will die in their religion... they were very fanatic in their saints and idols although lots of verses in the bible strictly forbidden it. But still, I have faith in our Lord, that the Gospel will smoothen their heart. So I still bring it to them.
