

Dear Brethren

I hope this message finds you all well , we are doing fine and the family is well .My purpose for this report is to keep all that have so generously continued in the fellowship with our brethren in need in Zimbabwe and Botswana .

I write this request on their behalf , as they have no other options but to rely on me to help them , which does place a huge amount of pressure and responsibility on me .I always will endeavour to help our brethren with the need of food and exhaust all options I have to help them .This however has been a task that has humbled me so much with loving brethren like all of you, firstly all the efforts , generosity and collections made by you to help our brethren in need with food , and secondly how great full and thankful our brethren react in receiving a bag of maize .It is a privilege and honour to work in our Lords kingdom , see his grace , see his blessings effecting those amongst us , it is good to be in our Lords service and I count myself blessed to be a messenger and helper for you .

As I have reported in my last few reports , I mentioned that our brethren would need help with food until April next year , this would be if our summer rains did come in time .I also mentioned in my last report that I would now at the beginning of December once again send out the call for help to secure the funds needed to buy maize for our brethren for the next four months Jan –April 2019.

This is where we are right now .

A total of 361 faithful brethren need help in varies congregations of Zimbabwe and Botswana, the help would be for me to supply one bag of maize meal for the month per person.

The current cost of a 20 kg bag of maize is \$ 16.25 in the rural area's .

The price has gone up by over a dollar since our last purchase about 3 months ago this is due to the new government tax policies and high inflation as mentioned in my last report.

I plan to once again try secure price and quantity for the next 4 months with suppliers , this means I have to pay up front like the previous times secured .

The amount would be $361 \times \$16.25 = \5866.25 per month .I am trying to raise enough for the 4 months total being \$ 23465.

As far as receiving the summer rains needed to plant this year's crops , the news is not good , very little rain has fallen not enough to plough up the fields as yet , but it is not too late we still have this month to plant if the rains come quick. I will keep you all posted on the developments , but please pray , pray , pray brethren .

I have attached some photo's for you to see , some were on my previous report , but for some reason not everyone received my attachment (Africa technology) .

Brethren my plea once again is for any help towards raising the funds needed to help our brethren , just one bag can mean life to one person .

Once again thank you so very much for your previous help and love in helping our brethren , please feel free to ask me any further questions you may have .

In Christ we serve
