Maturín Estado Monagas
Venezuela

We are very thankful to God because we are closing the month of April with rain in much of the country, this because the drought this strong summer with the effects of climate phenomenon "El Niño" has caused a drop in water levels in the hydroelectric dams where are systems that generate electricity, which has led to a nationwide rationing scheduled until the reservoirs to recover their levels with the rains.

Beloved brothers, I am happy to be alive and able to communicate again, by the grace and will of God.

As for my health, by God's grace, every day I improve more and more. Thank you for your prayers and please keep praying.

THE WORK OF GOD IN MATURIN CENTRO.

At this time we are having in worship services several non-Christian visitors with whom there is the possibility of organizing Bible studies in their homes, we appreciate your prayers in favor.

NEW MEETING SITE.

In previous newsletter I reported that we are already using the new meeting site, we thank God for helping us resolve the issue of meeting space. Here we have a good place to gather more people and location of the place is more accessible.

Meeting in the new building. New address is: Av Raul Leoni, diagonal to the Industrial Technical School (ETI) of Maturin, Building Melania Rosa, Mezzanina.

Radio. This month we reached transmission number 506 of the radio program "Facing the Bible" by the grace of God. There were two programs that could not go on the air because of electricity rationing, but, thank God,

the direction of the station launched an electricity generator that works with diesel oil, and was thus overcome the problem.

Prayers for health.

We include prayer request for the following brothers: In U.S.A. Helen (Elena), wife of our brother Ronald Roark and mother of Gregory, she was recently hospitalized, we pray for complete healing.

In Venezuela. For our sister Erika Granados, a member of the church in the center Maturín, she came out today five days of hospitalization, the sister was affected by an autoimmune disease known as virus Gillian Barre, and has been combined with classic dengue and megalovirus.

Antonio Perez, he is a preacher in the church in Ciudad Bolivar, Bolivar State, a week ago Antonio's kidneys stopped working and now they are doing dialysis every three days to purify his blood.

At the close of this newsletter as always I thank all brothers your prayers and continue to pray for one another. And our gratitude for participating settled me in this effort to continue spreading the pure gospel of our Lord Jesus Christ on this side of America.

In the love of Christ.

Antonio and family.
